Title :	Standards for the Inspection of Public Stock Paddy 
Date :	2008.02.27
Legislative :	<ol style="list-style-type: none">1.Promulgated on October 30, 1999.2.Amendment to Article 1 promulgated on March 15, 2002.3.Amendment to Article 4 promulgated on May 31, 2004.4.Amendment to all Articles promulgated on February 27, 2008.
Content :	<p>Article 1 The Standards are enacted in accordance with Article 9 of Food Administration Act.</p> <p>Article 2 For the collection of public stock, the paddy shall be produced by farmers in the current period and be circumscribed to Japonica rice and Indica rice, which are named and promoted by the central competent authority.</p> <p>Article 3 The terms in the Standards are defined as follows: <ol style="list-style-type: none">1. Test weight: the weight per liter2. Foreign matter: the matter other than the paddy itself3. Heat damaged kernel: the sound kernel or broken kernel damaged by microbiological heating with color changes from normal into yellow or dark yellow4. Sprouted kernel: the sound kernel or broken kernel sprouted, rooted or with the traces of sprouts or roots, including rotten-germ kernel (the rice of germ discoloration and rotten-germ)5. Damaged kernel: the sound kernel or broken kernel damaged by humidity, fungus, insect, or other reasons with obvious defects and deterioration, including fungus and insect damaged kernel(the rice damaged by disease, insect and fungus), fissure and cracked kernel(the rice of fissure endosperm), abnormal kernel (the deformed rice) and rusty kernel(the rice of rusty surface), not including heat damaged kernel6. Off-type kernel: the rice with different shapes7. Broken kernel: the rice broken. The size of a broken rice kernel shall be at least 1/4 up to 3/4 of the average length of 30 normal rice kernels8. Chalky kernel: over 1/2 of the rice kernels with opaque or chalky appearance9. Immature kernel: the immature and (or) stunted rice kernel and broken kernel</p> <p>Article 4 For the collection of public stock, the standards for paddy are as follows: <ol style="list-style-type: none">1. Test weight: Japonica rice weighted up to 530 grams per liter and Indica rice weighted up to 490 grams per liter2. Moisture: shall not exceed 13%3. Foreign matter: shall not exceed 0.5%4. Heat damaged kernel: shall not exceed 0.5%5. Sprouted kernel: shall not exceed 1%6. Damaged kernel: shall not exceed 5%7. Off-type kernel: shall not exceed 5%8. Broken kernel: Japonica rice shall not exceed 4% and Indica rice shall not exceed 8%</p>

9. Chalky kernel: Japonica rice shall not exceed 7% and Indica rice shall not exceed 5%

10. Immature kernel: shall not exceed 15%

11. Hygiene requirements shall conform to the relevant food hygiene laws of the Republic of China

The standards for inspection in Subparagraph 4 through Subparagraph 10 in the former Article shall be evaluated by the brown rice that has been ground.

Article 5

For specific variety groups that are named and promoted by the central competent authority, the quantity of the chalky kernels shall be standardized by other applicable quality control laws enacted by the central competent authority when it does not conform to Subparagraph 9 in paragraph 1 of the former Article.

Article 6

Hee Standards shall take effect on the date of promulgation.
